## Professional Summary

MERN Stack Developer with 3+ years of experience building scalable web applications, REST APIs, payment systems, and backend services using Node.js, Express.js, MongoDB, React.js, and TypeScript. Experienced in Stripe integrations, subscription billing, cron jobs, background workers, queue processing, and campaign automation systems. Strong understanding of scalable backend architecture, API security, debugging, and Agile/Scrum workflows.

## Experience

### Software Development Engineer – MERN Stack Shri Genesis Software Solutions

Jan 2026 – Present  
Jaipur, Rajasthan

*Success AI – B2B Campaign Automation Platform*

- Developed scalable backend services using Node.js, Express.js, MongoDB, and TypeScript.
- Optimized backend workflows and asynchronous processing for reliable large-scale campaign execution.
- Implemented Stripe subscriptions, add-ons, webhook handling, disputes, failed payments, and billing workflows.
- Built scalable campaign processing workflows using cron jobs, background workers, and queue-based job execution.
- Developed audience targeting and scheduling logic for LinkedIn and email outreach campaigns.
- Integrated third-party APIs and improved backend reliability through validation middleware, structured error handling, and modular architecture.
- Contributed to frontend bug fixes and API integration using React.js and TypeScript.

*Prachay – Financial Management Application*

- Fixed frontend bugs, improved UI consistency, and optimized React.js components.

### Software Development Engineer (SDE-1) – MERN AvikaLabs (AvikaSoft Services Pvt. Ltd.)

Apr 2025 – Dec 2025  
Jaipur, Rajasthan

- Developed REST APIs and reusable frontend modules using Node.js, Express.js, React.js, and TypeScript.
- Built JWT authentication, middleware-based authorization, and scalable modular architecture.
- Optimized application performance, debugging workflows, and deployment processes.
- Collaborated with QA and product teams in Agile/Scrum development cycles.

### Product Engineer Amoga Software Private Limited

Jun 2023 – Apr 2025  
Bengaluru

- Worked on a product-based enterprise application using React.js, JavaScript, and reusable UI components.
- Integrated REST APIs, resolved production bugs, and improved application responsiveness and stability.
- Collaborated with backend, QA, and product teams during sprint planning and release cycles.

## Skills

**Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Zustand, Tailwind CSS

**Backend:** Node.js, Redis, Express.js, REST APIs, JWT Authentication, RBAC, Middleware, Webhooks, Cron Jobs, Background Workers, Queue Processing

**Database:** MongoDB, Mongoose, Aggregation Pipeline, Indexing, Query Optimization

**Payments & Integrations:** Stripe, Subscription Billing, Third-Party APIs

**Tools:** Git, GitHub, Postman, Docker, CI/CD, Vercel, Render

## Projects

### Boardify – SaaS Kanban Manager (MERN + TypeScript)

- Built a full-stack Kanban management system using React.js, TypeScript, Node.js, Express.js, and MongoDB.
- Implemented drag-and-drop workflows, JWT authentication, activity logs, and protected routes.
- Deployed frontend and backend using Vercel, Render, and MongoDB Atlas.

## Education

**B.Tech in Computer Science Engineering**  
Laxmi Devi Institute of Engineering & Technology

**8.0 CGPA**
