## Professional Summary

---

I am a MERN Stack Developer with over two years of experience building **high-performance, scalable, and responsive web applications**. Skilled in **React.js, Next.js, TypeScript, Node.js, Express.js, and MongoDB** with strong expertise in **frontend architecture, reusable component design, UI/UX optimization, API integration, and performance enhancement**. Adept at collaborating in **Agile/Scrum** environments to deliver reliable, production-ready features for cross-functional teams.

## Experience

---

### Software Development Engineer (SDE-1) — MERN

Apr 2025 – Present

AvikaLabs (AvikaSoft Services Pvt. Ltd.)

Jaipur, Rajasthan

*Company specializing in advanced software development and enterprise solutions.*

- Developing **modular, reusable UI components** using React.js, TypeScript, and modern JavaScript.
- Building and maintaining **RESTful and secure APIs** with Node.js, Express, and JWT authentication.
- Optimizing frontend performance through **memoization, state management, SSR improvements, and clean architecture**.
- Enhancing code quality with **unit testing, debugging, and structured error handling**.
- Implementing **responsive design** and ensuring cross-browser compatibility.
- Collaborating with design, QA, and backend teams in an **Agile development workflow**.

### Product Engineer

Jun 2023 – Apr 2025

Amoga Software Private Limited

Bengaluru

*A software development company focusing on innovative technology solutions.*

- Built client-facing modules using **React.js, Hooks, and custom UI components**.
- Integrated **REST APIs**, optimized UI workflows, and improved application responsiveness.
- Debugged production issues and improved performance across major user workflows.
- Participated in **sprint planning, QA testing, code reviews, and CI/CD-based deployment**.
- Improved maintainability using **ES6+ standards, reusable patterns, and modular code architecture**.
- Worked closely with designers and backend engineers to enhance **UI/UX quality**.

## Skills

---

**Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind, Redux Toolkit, Zustand, Responsive Design, Component Architecture, UI/UX Optimization

**Backend:** Node.js, Express.js, REST APIs, JWT, Middleware, API Security, RBAC

**Database:** MongoDB, Mongoose, Aggregation Pipeline, Indexing

**Tools:** Git, GitHub, Postman, Webpack, Vercel, Render, Docker, CI/CD (Basic)

**Other:** Clean Code, Debugging, Agile/Scrum, QA Testing, Cross-Browser Compatibility

## Projects

---

### Boardify — SaaS Kanban Manager (MERN + TypeScript)

*A full-stack application to manage tasks in a Kanban board.*

- Built a full-stack Kanban management system using **React, TypeScript, Node.js, Express, and MongoDB**.
- Implemented **drag-and-drop workflow** using @hello-pangea/dnd with persistent state.
- Designed secure **JWT authentication**, protected routes, and robust backend validation.
- Built an **activity log system** capturing create, update, delete, and move events with timestamps.
- Deployed via **Vercel (frontend), Render (backend), and MongoDB Atlas**.

## Education

---

**B.Tech in Computer Science Engineering**

8.0 CGPA

Laxmi Devi Institute of Engineering & Technology
